## Chris Fagan Is 120% On The Money — Trust In The Fans & Tassie Talent !!!

Current Brisbane Lions coach Chris Fagan has quoted this week the Devils should be allowed to join the AFL despite the cloud over Mac Point. "They should let the team come in and then sort the stadium out, and that is how I have always viewed it," Fagan told the Herald Sun. "Just use facilities that are available (in Launceston and Hobart) with a longer-term plan to build a new stadium. "They can use the facilities that are already there and then over time, they have been upgraded. "It would be such a tragedy if the team itself doesn't go ahead because there wasn't a new stadium when there are other football fields down there that AFL footballers currently play on. "The surfaces are fantastic. "But I think it is only a noisy minority who don't want it (new stadium) anyway. The vast majority of Tasmanians I think do want it. "Once you have the team in there, then these things become easier."

Fantastic news for The Socceroos they are now almost set to have their six consecutive World Cup appearance after defeating Japan 1-0. It's definitely worth watching the replay with the always hard working Aziz Behich turning and spinning one into the back of the net.
